Hotel Room Booking Using Zoho One (SaaS)

Aim

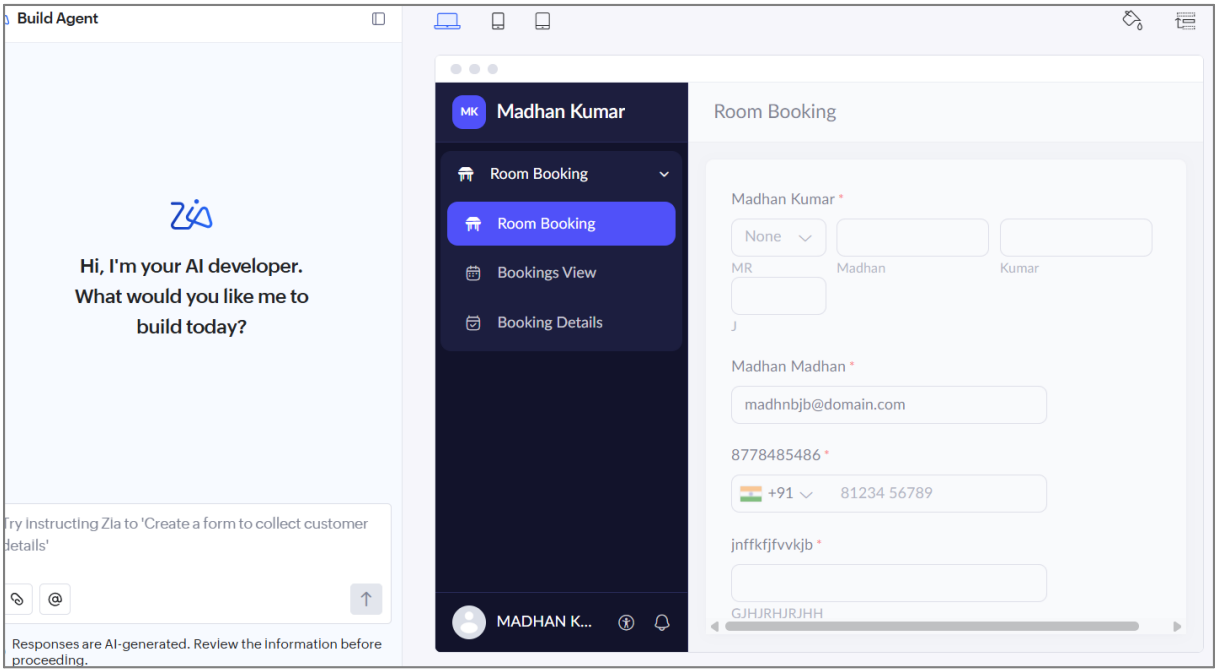

To create a Hotel Room Booking System using Zoho One as a cloud-based Software as a Service (SaaS) application.

Steps / Procedure

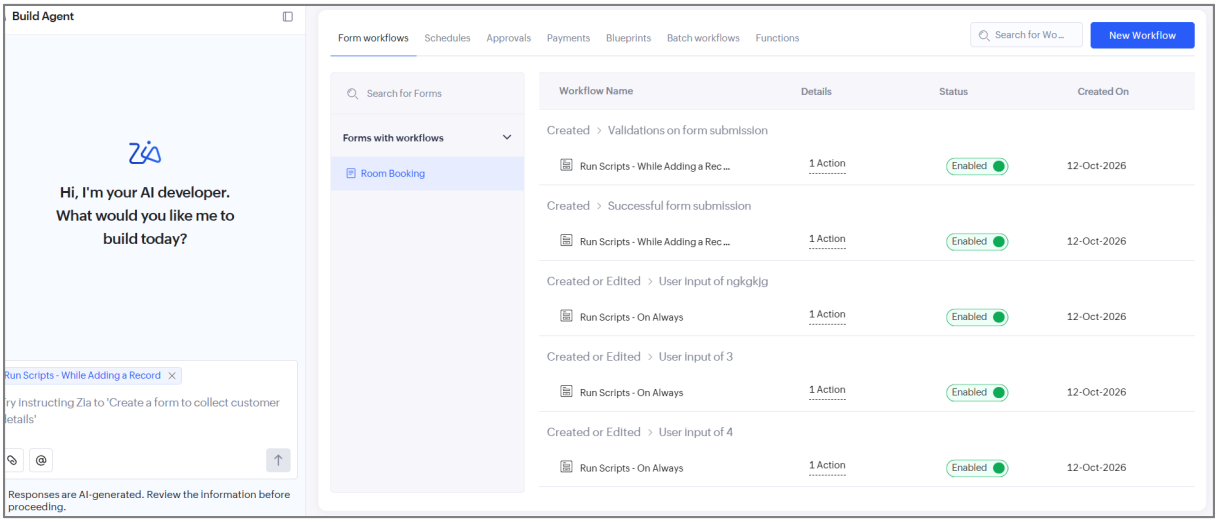

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One applications.
3. Create a new application for the Hotel Room Booking System.
4. Create a new form named Room Booking.
5. Add the required fields:
   - Guest Name
   - Email Id
   - Mobile Number
   - Room Type
   - Check-in Date
   - Check-out Date
   - Number of Guests
   - Special Requests
6. Configure the field types according to the data required (Name, Email, Phone, Dropdown, Date, Number, Multi-line text).
7. Design and arrange the form for easy user interaction.
8. Save and publish the form.
9. Add form workflows to validate the entries and to handle successful form submission.
10. Enter sample hotel room booking details into the form.
11. Submit the form and verify that the entered data is stored in the cloud (Bookings View and Booking Details).
12. Test the application by entering different booking details.
13. Verify that the Hotel Room Booking System works successfully as a SaaS application.

Implementation

Input:

Output (Form Workflows):

Result

Thus, a Hotel Room Booking System was successfully created using Zoho One and demonstrated as a Software as a Service (SaaS) application.
